SCHOOL-BASED TELEHEALTH SERVICES

What is a telehealth visit?

A telehealth visit uses a secure two-way video communication between the Aultman provider, the school clinic nurse, the sick student (or school staff member) and the parent or guardian. Medical equipment is used by the school nurse to assist the provider with the examination of the student. The school nurse uses technology through an AultmanNow cart to send video, images and sounds to the provider.

For what types of medical conditions might we use a telehealth visit?

Common issues seen by telehealth include pink eye, cough/cold, respiratory infections, sinus infections, ear infections, flu, rashes, allergies, migraines/headaches and sore/strep throats.

Who does AultmanNow school-based telehealth serve?

We provide services for the students and staff of the listed school districts.

How do I schedule an appointment?

For students who need to be seen for a same-day sick appointment while at school, please contact the school nurse to schedule a telehealth appointment.

For staff of the listed school districts or a parent/guardian calling with a sick student at home, please call the office to schedule an appointment at 330-627-8396.

Can a parent/legal guardian be present at the appointment?

A parent/legal guardian can participate virtually if they would like to participate in the visit.

We will not provide any services to a student without parent/guardian consent to treat.

What if I already have a primary care provider?

We do not replace your student or staff member's primary care provider.

What is the cost of the visit?

Aultman accepts most insurances, and your insurance will be billed for the visit. If you have questions about insurance, please contact the clinic.
